NOTICE OF ALLOWANCE

Status of the Claims

This action is in response to papers filed 15 September 2010 in which the previous rejections were traversed. Applicant's arguments are found convincing.

The previous rejections in the Office Action dated 24 May 2010 are withdrawn in view of the arguments.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The claims are drawn to a device for duplicating and characterizing nucleic acids. The device comprises a chamber body having a recess to hold a chip, a chip having an array of different polynucleotides and an optically permeable chamber support wherein the chamber body is unreleasably sealed to the chamber support.

The closest prior art (McGarry, U.S. Patent No. 6,642,046: IDS of 28 July 2004) teaches a device (Fig. 1-5) having a chamber body (32) having a recess (40) to support a biochip (20) and a chamber support (62). However the reference specifically and repeated teaches temporary clamping the chamber support and body (Abstract). It is the opinion of the examiner that the prior art does not teach or make obvious the instantly claimed amplification device having a biochip between two unreleasably sealed structures as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Claims 51-68 are allowed.
